

## WS6.4 Exercise 4: Creating a Proposal

### The Task

You want to create a proposal outline for a topic of your choice with motivation, description, and budget outline.

Proposed topic here:

### Step1: .

#### ChatGPT Example:

Write a proposal with strong motivation (why), description (what), and implementation plan (how). Include a budget outline. The topic is "how to teach lecturers to use AI tools in their work outside the classroom."

Answer:

## Proposal for Training Lecturers in the Use of AI Tools for Professional Development

### Executive Summary:

The advent of AI tools has substantially transformed educational landscapes, offering advantages in productivity, data analysis, and content creation. However, a gap exists in the proficiency of lecturers in harnessing these tools for tasks outside of teaching. This proposal aims to address this skill deficit by implementing a comprehensive training program tailored for lecturers to effectively utilize AI tools for their professional development.

---

### Motivation:

**Efficiency & Productivity:** Utilization of AI tools can automate mundane tasks, allowing lecturers to focus on higher-order academic responsibilities.

**Data-Driven Decision Making:** AI analytics can offer insights into research trends, grant opportunities, and academic networking.

**Professional Competency:** Keeping pace with technological advances is crucial for remaining competitive in academia.

---

### Description:

**Program:** A 3-month, multi-module training program comprising of:

**Introduction to AI Tools:** An overview of available AI tools relevant to academic research, content creation, and data analytics.

**Hands-On Workshops:** Practical sessions for using specific tools like AI-powered research databases, analytical software, and content generators.

**Ongoing Support:** A resource hub and mentorship program to offer continued support post-training.

---

### Implementation Plan:

**Needs Assessment:** July 1 - July 15

- Conduct a survey among lecturers to identify specific needs and skill levels.

Curriculum Development: July 20 - August 10

- Collaborate with experts to design the training modules.

Training Program: September 1 - November 30

- Conduct bi-weekly training sessions, supplemented with webinars and workshops.

Evaluation and Feedback: December 1 - December 15

- Assess the effectiveness of the program through surveys and interviews.

---

### Budget Outline:

Needs Assessment: \$2,000

- Survey tool subscription and analysis

Curriculum Development: \$8,000

- Expert consultations and material preparation

Training Program: \$25,000

- Venue, logistics, and trainer fees

Ongoing Support: \$5,000

- Maintenance of resource hub and mentorship program

Evaluation and Feedback: \$3,000

- Tools for assessment and data analytics

Total Budget: \$43,000

---

By empowering lecturers to fully leverage AI tools, this initiative aims to enhance academic excellence and contribute to professional development in a substantive manner.
